Week 2 MCQ Programming

Each question carry 1 marks each

4. **1. Where to declare instance variables ? *** 1 point

Mark only one oval.

- ( ) It declares inside the method.
- (✓) It declares inside the class and outside of method.
- ( ) It declares inside the class with static prefix and outside of method.
- ( ) It can be declared anywhere

5. **2. What is the output of this program?** * 1 point

```
public class TestMain {
    public static void main(String[] args) {
        int abc;
        System.out.println(abc+" default value");
    }
}
```

Mark only one oval.

- 0 default value
- default value
- ✓ Compile time error - Local variable may not have been initialized
- none of the above

6. **3. A variable declared inside the method is known as** * 1 point

Mark only one oval.

- method variable
- instance variable
- ✓ local variable
- static variable

7. **4. Which are the ternary operators ?** * 1 point

Mark only one oval.

- ++
- ✓ ? :
- –
- all of the above

8. **5. What is the right output of this program ?** * 1 point

```
class OperatorExample{
        public static void main(String args[]){
        int a=16;
        int b=9;
        System.out.print(a++ - ++a);
        System.out.print(b++ + b++);
}}
```

Mark only one oval.

- [x] -2 19
- [ ] 1 18
- [ ] 2 19
- [ ] -1 18

9. **6. A variable must be declared by a** * 1 point

Mark only one oval.

- [ ] variable name
- [ ] access modifier
- [x] data type
- [ ] int

10. **7. What is the right output of this program ?** * 1 point

```
public class TernaryOperators {
    public static void main(String[] args) {
        int a = 10;
        String result = a > 5 ? "Hello 1" : "Hello 2";
        System.out.println(result);
    }
}
```

Mark only one oval.

- ( ) true
- ( ) false
- ( ) Hello 2
- (✓) Hello 1

11. **8. Decrement operator, --, decreases the value of variable by what number?** * 1 point

Mark only one oval.

- (✓) 1
- ( ) 2
- ( ) 3
- ( ) 4

12. **9. What is the output of relational operators?** * 1 point

Mark only one oval.

- ( ) integer
- (✓) boolean
- ( ) string
- ( ) float

13. **10. Which of the following can be operands of arithmetic operators?** * 1 point

Mark only one oval.

- [x] numeric
- [ ] characters
- [ ] boolean
- [ ] none of the above
